## Research Interests

My research interest focuses on **young children’s acquisition, learning, and development of social-cognitive understanding**, studied via behavioral experiments, neuroimaging, psychometrics and statistics, and computational modeling. Specific topics include the underlying mechanism/computation of theory of mind, the development of theory of mind, and how theory of mind varies across different social-cultural contexts and diverse samples (e.g., gender, race, ethnicity, social classes, cultures, bilingualism, and neurodiversity).
