## PROFESSIONAL EXPERIENCE

*NTU, Language Neuroscience Laboratory (Mentor: Prof. Tai-Li Chou) 2017/2-Now*

- Develop functional magnetic resonance imaging (fMRI) studies to investigate the underlying mechanism of social cognition in typical developing children.
- Identify aberrant cognitive organizations in autism spectrum disorder (ASD) patients and propose a framework for their atypical social processing.
- Understand the differences in neural correlates of semantic processing between typical developing subjects and schizophrenia patients.
- Investigate language comprehension and the corresponding neural activities in bilingual adults.
- Design a new analysis method that implement machine learning algorithms to analyze near functional infrared spectroscopy (fNIRS) data.
- Establish a model to interpret the mechanism of human empathy.

*NCKU, Language Acquisition and Cognitive Development Laboratory (Mentor: Prof. Jon-Fan Hu) 2014/9-Now*

- Pioneer Taiwan's fNIRS research to explore the neural mechanism of first impression formation.
- Adopt behavioral experiments in embodied perspective to probe semantic properties of emotion words.
- Develop fMRI study to investigate the underlying relationships between ToM and humor processing.
- Establish the valid and reliable scale to measure self-report empathy ability
- Design developmental experiments to understand the interaction between ToM, empathy and social development.

*NCKU, Cognitive and Affective Neuroscience Laboratory (Mentor: Prof. Der-Yow Chen) 2014/9-Now*

- Develop a multi-fMRI scanners hyper-scanning paradigm to investigate the neural underpinnings of social interaction.
- Investigate the relationship between perspective taking and emotion processing using interactive social decision-making tasks.
- Probe the underlying metalizing processes and cognitive abilities of playing Chinese Go from the experimental psychology perspective.

- Design an user-friendly web application for exploratory factor analysis (EFA) by using shiny package in R
- Develop exploratory graphical tools for Event Related Potentials (ERPs) and fNIRS data analysis
